

i can

...have twice
the impact

I can go beyond a purely clinical role to change the lives of people in the community and guide the way healthcare develops in my field. Taking on such a complex role ensures I'm personally and professionally rewarded. At SA Health, I can tap into all the resources I need to continually advance my career.

Job Ref: 587089 - Perfusion Consultant

- **Royal Adelaide Hospital, Adelaide CBD**
- **Indicative Total Remuneration: \$110,205 - \$120,406 – Perm F/T – AHP4**

You will be responsible for providing perfusion services which result in the safe care of patients undergoing cardiopulmonary bypass and related procedures at the Royal Adelaide Hospital. This will include preparing, initiating and monitoring adult cardiac support devices such as the heart lung machine, intra-aortic balloon pump, extracorporeal membrane oxygenation system, and cell saver.

Administering pharmacological/anaesthetic agents as required, you will ensure adequate stock levels of clinical disposable equipment. Managing a high standard, cost effective perfusion service, you will participate in strategic planning, safety and quality initiatives and accreditation as it relates to the unit.

The Royal Adelaide Hospital is the largest teaching hospital in South Australia, and the Cardiothoracic Unit is one of the largest of its type in Australia. Working closely as part of a multidisciplinary team that makes up the Cardiothoracic Unit, you will be part of a progressive service that continually strives to improve the quality of care that it provides. The Cardiothoracic Surgery Unit has modern and up-to-date equipment and an experienced team of staff.

Holding a Bachelor of Science degree or an equivalent qualification, you will have demonstrated experience in all types of extra-corporeal life support and Cardio-Pulmonary Bypass Techniques. In addition, you will have a proven track record of strategic planning and innovative service developments, analysis and review, especially as it relates to perfusion services. Along with extensive time and caseload experience in all associated clinical fields, you will be confident in undertaking research projects. Your ability to communicate effectively and work as part of a team will equip you to effectively respond in critical medical situations.

Appointment will be subject to a satisfactory Criminal History Check. **Job Ref: 587089**

Applications close: 6 June 2016
